

Global Data Privacy & Customer Data Handling Policy

Document Code: DOC-POL-02 | **Type:** POLICY | **Current Version:** 2.0

Organization: ApexNova Global Technologies | **Department:** DATA_AI | **Precedence Level:** 1

Version 2.0 — Zero PII in non-production, 30-day erasure SLA, strict geographic data residency, and 365-day retention cap.

Section 2.1: Privacy Framework & GDPR/CCPA Compliance

ApexNova complies with GDPR, CCPA, and global privacy standards. Personal Identifiable Information (PII) must only be collected for explicitly consented business purposes.

Section 2.2: Strict Ban on Real PII in Non-Production

Under no circumstances may live production customer data or unmasked PII be imported or stored in development, staging, sandbox, or test environments. Fully synthetic or tokenized data must be utilized.

Section 2.3: Right to Be Forgotten & Erasure SLA

Customer requests for data erasure must be processed and fully wiped from all operational clusters and cold backups within 30 calendar days.

Section 2.4: Data Residency and Regional Isolation

Customer telemetry and database records must remain within the sovereign region (EU, US, APAC) designated in the customer agreement. Cross-border transfers require legal DPA approval.

Section 2.5: Data Retention & Archival Schedules

Transactional logs must be archived after 90 days and permanently expunged after 365 days unless legal holds apply.
