

Acceptable Use of Corporate IT Assets & AI Tools Policy

Document Code: DOC-POL-04 | **Type:** POLICY | **Current Version:** 2.0

Organization: ApexNova Global Technologies | **Department:** INFRA_IT | **Precedence Level:** 1

Version 2.0 — Strict ban on customer data in public consumer LLMs, mandatory verification of AI output, and open-source license governance.

Section 4.1: Corporate Equipment Usage Standards

ApexNova computing hardware, networks, and cloud instances are reserved for authorized business functions. Installation of unauthorized software is blocked by endpoint protection.

Section 4.2: Enterprise AI & LLM Governance

Employees may only use company-approved GenAI platforms with enterprise data privacy agreements. Inputting proprietary code, customer telemetry, financial statements, or PII into unauthorized public consumer AI platforms (e.g. public consumer ChatGPT/Claude) is strictly prohibited and treated as a data leak violation.

Section 4.3: Verification of AI-Generated Content

Engineers and content creators utilizing approved AI tools must independently inspect, review, and validate all generated code and text for security flaws, factual hallucinations, and copyright compliance before production merge.

Section 4.4: Open Source License Hygiene

Developers must not incorporate viral GPL-v3 or AGPL copyleft libraries into proprietary distributed products without Architecture Review Board signoff.
