

Remote Work, Hybrid Operations & Mobile Device Security Policy

Document Code: DOC-POL-06 | **Type:** POLICY | **Current Version:** 2.0

Organization: ApexNova Global Technologies | **Department:** INFRA_IT | **Precedence Level:** 1

Version 2.0 — Enforced whole-disk encryption, mandatory ZTNA on public Wi-Fi, and Intune MDM for mobile email.

Section 6.1: Remote Work Eligibility & Environment

Eligible remote employees must maintain a private workspace with secure high-speed internet and ergonomic seating.

Section 6.2: Endpoint Disk Encryption Standards

All company-provided laptops must have BitLocker (Windows) or FileVault (macOS) full-disk encryption enabled and active prior to network authorization.

Section 6.3: Public Network Connection Standards

When connecting through public Wi-Fi (airports, cafes, hotels), employees must route all network traffic through the company Zero Trust Network Access (ZTNA) tunnel.

Section 6.4: Mobile Device Management (MDM) Mandate

Access to corporate email, Slack, or ticketing platforms on smartphones requires enrolling the device in Microsoft Intune MDM, permitting containerized corporate remote wipe upon separation or loss.
