

Production Deployment, Change Advisory Board (CAB) & Rollback SOP

Document Code: DOC-SOP-04 | **Type:** SOP | **Current Version:** 1.0

Organization: ApexNova Global Technologies | **Department:** ENG_DEV | **Precedence Level:** 2

Version 1.0 — Formal CAB change control, 3-stage canary releases, automated rollback thresholds, and Friday afternoon deployment blackouts.

Section 4.1: Standard & Emergency CAB Approval

All production software deployments require a submitted Change Request (CR) approved by the Change Advisory Board (CAB) at least 24 hours prior to release window. Emergency hotfixes require dual sign-off from VP Engineering and Director of SecOps.

Section 4.2: Automated Canary Deployment Strategy

Deployments must proceed via canary rollout: 5% traffic for 30 minutes, 25% for 1 hour, and 100% only if error budget degradation remains below 0.05%.

Section 4.3: Automated Rollback Criteria

If p99 latency spikes by >25% or 5xx server error rate exceeds 0.1%, automated deployment orchestrators trigger an immediate rollback to the previous stable release artifact.

Section 4.4: Deployment Blackout Windows

No standard production deployments are permitted on Fridays after 14:00 UTC or during major global peak retail holidays without explicit CTO exemption.
